Cloud Engineer CDP Maintenance and Deployments

Job Profile

- Responsible for the configuration, maintenance and management of the cloud solutions Azure, AWS, GCP and Huawei Cloud infrastructure
- Drive and supervise the build-out, deployment & on-going maintenance of security controls, including recommendations for DevOps additions and process improvement
- Monitoring system performance, identifying bottlenecks and optimizing cloud resources to enhance efficiency and cost-effectiveness
- Document GitHub Actions workflows, best practices and guidelines for team members to ensure consistency and knowledge sharing
- Collaborate with development and operations teams to implement CI/CD pipelines using in-house platform for automated deployment and testing

Applicant's Profile

- 4+ years working experience in a DevOps/Cloud Engineer position
- Proven knowledge of cloud-based development, automation and deployment (GCP, AWS, Azure, Huawei etc.)
- 3+ years of hands-on experience with Kubernetes and container orchestration technologies with cloud platforms
- Familiarity with containerization concepts and experience working with container registries
- Strong understanding of networking concepts, security principles and best practices in Cloud
- Hands-on experience with IaC (infrastructure as code e.g. ARM template / Terraform)
- Good understanding of CI/CD, DevOps and Agile methodologies
- Language proficiency in English, both written and spoken
- Advanced knowledge of Linux
- Proficiency with scripting languages (Python / PowerShell)
- Experience developing InSpec test cases

The successful candidate will be provided with an attractive remuneration package, commensurate with benchmarked financial institutions.

Interested candidates are invited to apply for the position, all applications should be routed through our corporate website.
