

WE ARE HIRING

Senior Software Engineer - Full Stack

We are looking for a Senior Software Engineer with experience in Laravel, React, React Native, MySQL, and AWS. The role involves working with cross-functional teams to resolve global customer issues, with a focus on Agile environments and CI/CD practices.

Key Responsibilities :

- Develop and maintain scalable web and mobile applications using Laravel, React, and React Native
- Design and optimize MySQL databases for performance and reliability.
- Implement AWS cloud solutions (EC2, S3, Lambda).
- Collaborate with support teams to resolve global customer issues promptly.
- Provide technical guidance to the sales team on product-related concerns.
- Work with QA to ensure thorough testing of features and bug fixes before release.
- Participate in smooth production release processes, including deployment and monitoring.
- Contribute to Agile sprints for timely, high-quality code delivery.
- Follow and enhance CI/CD processes using Bitbucket.
- Participate in code reviews to ensure adherence to coding standards and best practices.

Requirements :

- **3-4 years of Full Stack Development** experience.
- Proficiency in **Laravel** for backend development.
- Strong **MySQL** database management skills.
- Experience in API development and microservices architecture.
- Hands-on experience with **AWS services (EC2, S3, Lambda)**.
- Proficiency in **React** and **React Native**.
- Familiarity with **Agile methodologies** and sprint-based work.
- Ability to collaborate with **support** and **sales teams** to resolve customer issues.
- Experience with CI/CD pipelines, particularly using **Bitbucket**.
- Strong communication and cross-functional teamwork skills.

Nice-to-Have :

- Familiarity with Docker, Kubernetes, or other containerization tools.
- Knowledge of test-driven development and testing frameworks
