CHARTERED CIVIL ENGINEER

A highly qualified Chartered Engineer is responsible for providing expert technical guidance and ensuring that all engineering activities meet the highest standards of quality, safety, and compliance. The role includes reviewing and approving designs, conducting technical evaluations, overseeing project execution, and supporting decision-making with sound engineering judgement. This position requires strong analytical skills, in-depth knowledge of engineering standards, and the ability to collaborate effectively with clients, consultants, and project teams to deliver efficient and reliable engineering solutions.

Job Responsibilities

- Lead, plan, and manage civil engineering projects from design to completion.
- Oversee site inspections, structural assessments, and quality assurance processes.
- Prepare engineering designs, technical reports, BOQs, and project documentation.
- Ensure compliance with industry standards, safety regulations, and client requirements.
- Coordinate with contractors, consultants, and internal teams to ensure smooth project execution.
- Provide professional guidance and mentorship to junior engineers and technical staff.

Candidate Profile

- BSc in Civil Engineering or equivalent; MSc will be an added advantage.
- Chartered Engineer (CEng) status from a recognised engineering institution (e.g., IESL).
- Minimum 5–7 years of relevant industry experience.
- Strong proficiency in structural design, project planning, and engineering software (AutoCAD, Civil 3D, STAAD, etc.).
- Excellent leadership, communication, and problem-solving skills.
- Ability to handle multiple projects and work in a fast-paced environment.

If you think you have what it takes to be successful in this challenging role, **please apply via email to careers@hayleysfentons.com** indicating the position applied for on the subject line of the email. Pay and benefits for the above position will be competitive & the rewards are performance driven.

Hayleys is an Equal Opportunity Employer.
