Then join an elite team of professionals at Epic and start ascending your career!

Senior QA Engineer

Key Responsibilities:

- Lead planning, execution, and reporting of all QA activities.
- Design comprehensive test plans and strategies for new features and releases related to card management systems.
- Perform advanced functional, regression, API, and integration testing.
- Drive automation initiatives and optimize test frameworks.
- Conduct root cause analysis (RCA) and contribute to continuous improvement.
- Mentor and coach junior QA engineers.

Qualifications & Skills:

- BSc in Computer Science or equivalent.
- Minimum of one year or more than experience in Senior QA Engineer role.
- Advanced understanding of STLC, SDLC, and QA methodologies.
- Hands-on experience in API testing (Postman, Swagger, REST APIs).
- Exposure to automation tools such as Selenium, Appium, Playwright, etc.
- Exposure to performance testing using JMeter, k6.
- SQA Certification such as ISTQB/CSTE will be an added advantage.
- Strong communication and Leadership skills.
