

Public Notice – Implementation of Fuel QR System

In light of the prevailing geopolitical developments in Middle East, the petroleum product supply chain has been adversely affected. At the same time, the demand for fuel has increased abnormally, resulting in a depletion of the country's existing fuel stock. Therefore, it has become necessary to carefully manage the available fuel reserves in order to sustain the nation's economic activities.

Furthermore, it has recently been observed that certain groups have been illegally purchasing fuel in excessive quantities. The Government of Sri Lanka intends to prevent such improper consumption and ensure an uninterrupted fuel supply for the day-to-day needs and economic activities of the general public.

Accordingly, a QR code system will be implemented with effect from 06.00 a.m. on **15.03.2026**.

Fuel will not be issued by any operating filling station in the country without a valid QR code from 06.00 a.m. on **15.03.2026**.

Steps to Obtain the QR Code

1. Users who have already registered for the QR Code

- i. Users whose vehicle ownership and registered mobile number remain unchanged since their initial registration may download their QR Code from the website <https://fuelpass.gov.lk/> starting from midnight on 14.03.2026, using the 'Vehicle Login' button.
- ii. Users whose vehicle ownership or registered mobile number has changed since their last registration are required to re-register their details through the website <https://fuelpass.gov.lk/> starting from 6.00 a.m. on 15.03.2026, using the 'Vehicle Registration' button.

2. Users who have not previously registered for the QR Code and users with newly registered vehicles at the RMV

- i. Registration can be completed starting from 06.00 a.m. on 15.03.2026 through the website <https://fuelpass.gov.lk/>, using the 'Vehicle Registration' button.

The number of litres allocated for each category of vehicle is stated in the attached document.

A special fuel issuance system will be implemented for vehicles required to support national production and essential services.
